Permit Number: C0150007

Inspection Type: COMPLETE

Inspection Date: Wednesday, December 08, 2004

Page 3 of 3

### 1. Permits, Change, Transfer, Renewal, Sale

The reclamation permit was renewed on January 29, 2002 and expires January 30, 2007.

#### 2. Signs and Markers

A sign containing the required information was posted at the entrance to the access road.

# 4.a Hydrologic Balance: Diversions

There are water bars along the access road that divert runoff to the outslope of the road. At the time of this inspection, they, as well as the site, were covered with 6-8" of snow.

### 4.b Hydrologic Balance: Sediment Ponds and Impoundments

There are no sediment ponds or impoundments at this site. Surface roughening and silt fences are the primary sediment controls.

### 4.c Hydrologic Balance: Other Sediment Control Measures

Water bars along the access road provide additional sediment control. As previously noted, they were snow covered at the time of this inspection.

## 4.d Hydrologic Balance: Water Monitoring

The silt fence on the left side of the reclaimed area has been repaired. Samples and field measurements were taken on October 7, 2004 for the two sites on Ivie creek. Monitoring at the site is done biannually to capture peak and low flows.

#### 4.e Hydrologic Balance: Effluent Limitations

lvie creek was frozen and snow covered. However, streamflow could be heard beneath the ice.

# 8. Noncoal Waste

The reclaimed site is void of any noncoal waste.

# 9. Protection of Fish, Wildlife and Related Environmental Issues

Three elk have been feeding and bedding on the reclaimed site. They have been feeding on the Fourwing Saltbush and Cheat grass.

### 21. Bonding and Insurance

The surety bond is on record for \$90,758 and is effective for the permit period. The rider is dated January 8, 1997. Insurance was renewed and is effective from November 5, 2004 to November 5, 2005.
